Name _____

Question Slips Answer Key

Sample Student Responses (will vary):

- **Literal:**

  Question: What did Carlos use to look at the stars?

  Answer: A small telescope.

- **Inferential:**

  Question: Why was Carlos inspired to become an astronomer after seeing the meteor?

  Answer: Because the meteor made him realize how amazing space is and gave him a sense of wonder about the universe.

- **Evaluative:**

  Question: Do you think seeing natural events like meteors can influence a person's career choice? Why or why not?

  Answer: (Varies; acceptable answers could include "Yes, because real experiences inspire curiosity and goals" or "No, because careers depend on many other factors like schooling and opportunities.")

Teacher Notes:

- Use this as a reflective **end-of-lesson activity** to assess understanding.
- Focus on whether students correctly sort their questions into the three categories.
- Evaluative responses should show reasoning, not just opinion.
- Collecting slips provides a quick formative assessment of comprehension and question differentiation.
