

Name _____

Quotient Connections Answer Key

- | | |
|------|-------|
| 1. I | 7. G |
| 2. J | 8. K |
| 3. B | 9. E |
| 4. F | 10. C |
| 5. L | 11. H |
| 6. A | 12. D |

Challenge:

- Repeated quotient: 2.4. Problems 3 and 8.
- Repeated quotient: 7.1. Problems 5 and 10.

Teacher's Guide

- Have students solve each division expression before looking for its matching quotient.
- Encourage students to eliminate matched answers to reduce possible choices.
- Support students by allowing them to estimate each quotient before calculating exactly.
- Pair students to compare matches and explain how they verified each quotient.
- Turn the activity into a timed challenge after students have practiced individually.
- Extend the lesson by asking students to create four new division expressions that match two existing quotients from the puzzle.
