

Name \_\_\_\_\_

## Build It Back Up

**Directions:** Each problem shows a division with a missing starting number (dividend). Use **repeated addition** or **multiplication** to figure out what the starting number should be. Write your work and the final answer.

1.  $\_\_\_ \div 4 = 5$

→ Think:  $4 + 4 + 4 + 4 + 4 = \_\_\_$

6.  $\_\_\_ \div 8 = 3$

→ Think:  $8 + 8 + 8 = \_\_\_$

2.  $\_\_\_ \div 3 = 7$

→ Think:  $3 + 3 + 3 + 3 + 3 + 3 + 3 = \_\_\_$

7.  $\_\_\_ \div 7 = 4$

→ Think:  $7 + 7 + 7 + 7 = \_\_\_$

3.  $\_\_\_ \div 2 = 9$

→ Think:  $2 + 2 + 2 + 2 + 2 + 2 + 2 + 2 + 2 = \_\_\_$

8.  $\_\_\_ \div 9 = 2$

→ Think:  $9 + 9 = \_\_\_$

4.  $\_\_\_ \div 5 = 2$

→ Think:  $5 + 5 = \_\_\_$

9.  $\_\_\_ \div 5 = 4$

→ Think:  $5 + 5 + 5 + 5 = \_\_\_$

5.  $\_\_\_ \div 6 = 3$

→ Think:  $6 + 6 + 6 = \_\_\_$

10.  $\_\_\_ \div 3 = 8$

→ Think:  $3 + 3 + 3 + 3 + 3 + 3 + 3 + 3 = \_\_\_$
