### Teacher's Guide

#### Skill Focus:

- Students identify and correct **double consonant** errors in a playful context.
- Builds awareness of spelling patterns that appear in real-world print like menus and labels.

#### Differentiation Tips:

- Provide a short list of common food-related words with double consonants to scaffold for emerging learners.
- Challenge advanced students to explain whether each correction is due to the doubling rule, general spelling conventions, or both.

#### Engagement Ideas:

- Let students design their own mini menu with at least three items that correctly use double consonants.
- Turn it into a partner activity where one partner writes menu items with intentional errors and the other fixes them.

#### Extension Idea:

- Have students write a short advertisement for the café using at least two doubled-consonant words and one food item from the corrected menu.
