Cosmic Cartoonist Assignment

The **Galactic Gazette** has hired you to create a 4–6 panel **comic strip** that explains how Earth's movements cause **day and night** and **the seasons**. But this isn't just any comic—it's going to be read by curious aliens across the galaxy who want to understand how time works on Earth.

Comic Strip Requirements:

Your comic should include:

- At least **4 comic panels**
- Earth **spinning on its axis** (rotation = day and night)
- Earth **orbiting the Sun** (revolution = seasons)
- Clear **characters** (Earth, Sun, or a narrator alien?)
- At least **2 speech bubbles or captions** that explain what's happening
- Use **labels or arrows** to show motion (e.g., rotation direction, sunlight, tilt)
