Emojis are more than fun pictures - they're tiny ideas! When people send emoji "prompts" to artificial intelligence (AI), the computer uses them to imagine stories, scenes, or artwork. Each emoji is like a clue in a mystery. Your job is to turn those clues into words and show what the AI might create.

Directions - Look at each emoji line below. Then, imagine what kind of story, picture, or moment an AI would create from it. Write a short description (3-5 sentences) for each one. Be creative - focus on sights, sounds, feelings, and details.
