Name _____

Mood Swings and Microchips

Emojis show feelings - but how would a robot understand them?
AI doesn't *feel* emotions. It studies shapes, colors, and patterns to guess what people mean. Your job: Pretend you're the AI! Look at each emoji and write a sentence explaining how a computer might interpret that emotion.

Directions Write one thoughtful sentence for each emoji. Explain what emotion the AI might detect and what clues (like mouth, eyes, or color) help it decide.

1. 😳 _____

2. 😃 _____

3. 😡 _____

4. 😢 _____

5. 🤩 _____

6. 😳 _____

7. 😴 _____

8. 🤭 _____

9. 😎 _____

10. 😱 _____

11. 🥰 _____

12. 😛 _____
