3. She used a small net.
4. The bug clung to the net.

Teacher's Guide

- This activity strengthens students' ability to spot **ending digraphs** within connected text while also practicing comprehension.
- Support learners by modeling how to read slowly and listen for the final sound of a word before deciding if it contains the target digraph.
- For differentiation, provide a shorter version of the paragraph or highlight a few example digraphs to guide early readers. For students ready for a challenge, ask them to write one extra sentence using a digraph word from the story.
- For engagement, turn the search into a timed word hunt or let students work with partners and compare which digraph words each found.
