

Name _____

Difference Pairs Answer Key

1. C. 60
2. H. 100
3. E. 220
4. G. 400
5. D. 700
6. A. 1,500
7. F. 3,000
8. B. 5,000

Teacher's Guide

- Have students round each number first, subtract the rounded values, and then locate the matching estimate.
- Review how the indicated place value determines which digit students use when rounding.
- For students needing support, let them write the rounded subtraction expression beside each problem.
- For advanced students, have them calculate the exact differences and compare them with the estimates.
- Add engagement by asking students to complete the matches without using each answer choice more than once.
- As an extension, students can create two new subtraction expressions that round to one of the estimated differences shown.
