

Name _____

Quotient Sense Answer Key

1. 10
2. 20
3. 50
4. 100
5. 200
6. 40
7. 50
8. 50
9. 100
10. 200

Teacher's Guide

- Quick implementation: Remind students to use nearby multiples and number sense instead of finding exact quotients.
- Differentiation: Have students multiply each divisor by the three benchmarks and compare the products with the dividend.
- Engagement: Ask students to make their benchmark choice first, then explain which multiplication fact supports it.
- Extension: Have students write one new division expression that would be approximately equal to each benchmark used on the worksheet.
