

Quotient Roundup

Directions: Round as indicated. Then divide the rounded numbers to estimate each quotient.

1. $487 \div 6$

Round 487 to the nearest hundred.

Estimate: _____ $\div$ 6 = _____

6. $1,638 \div 19$

Round 1,638 to the nearest hundred and 19 to the nearest ten.

Estimate: _____ $\div$ _____ = _____

2. $723 \div 9$

Round 723 to the nearest hundred.

Estimate: _____ $\div$ 9 = _____

7. $2,764 \div 31$

Round 2,764 to the nearest hundred and 31 to the nearest ten.

Estimate: _____ $\div$ _____ = _____

3. $1,184 \div 4$

Round 1,184 to the nearest hundred.

Estimate: _____ $\div$ 4 = _____

8. $4,246 \div 42$

Round 4,246 to the nearest hundred and 42 to the nearest ten.

Estimate: _____ $\div$ _____ = _____

4. $2,438 \div 8$

Round 2,438 to the nearest hundred.

Estimate: _____ $\div$ 8 = _____

9. $5,891 \div 61$

Round 5,891 to the nearest hundred and 61 to the nearest ten.

Estimate: _____ $\div$ _____ = _____

5. $3,572 \div 6$

Round 3,572 to the nearest hundred.

Estimate: _____ $\div$ 6 = _____

10. $7,146 \div 69$

Round 7,146 to the nearest hundred and 69 to the nearest ten.

Estimate: _____ $\div$ _____ = _____
