

Name _____

Estimate Express Answer Key

1. $50 + 30 = 80$
2. $70 + 30 = 100$
3. $100 + 300 = 400$
4. $400 + 400 = 800$
5. $600 + 200 = 800$
6. $1,000 + 3,000 = 4,000$
7. $4,000 + 1,000 = 5,000$
8. $290 + 540 = 830$
9. $1,500 + 3,300 = 4,800$
10. $5,000 + 3,000 = 8,000$

Teacher's Guide

- Quick implementation: Review the rounding rule before students begin. Have students underline the digit in the specified place before rounding.
- Differentiation: Let students who need support use a place-value chart. Challenge advanced students to complete the problems mentally.
- Engagement: Have students earn one point for each correct rounded addend and one point for each correct estimated sum.
- Extension: Ask students to find each exact sum and compare it with the estimate. They can decide whether the estimate is greater than or less than the exact answer.
