

Name _____

Estimate Showdown Answer Key

1. D. 4,100
2. A. 3,200
3. D. 800
4. B. 50
5. C. 6,000
6. A. 3,200
7. C. 2,400
8. B. 40

Teacher's Guide

- Quick implementation: Have students identify the needed operation before examining the choices. Encourage rounding or compatible numbers for mental computation.
- Differentiation: Let students cross out clearly unreasonable choices first. For additional support, allow them to write rounded numbers beside each problem.
- Engagement: Award one point for each winning estimate. Ask students to identify what mistake could have produced one incorrect choice.
- Extension: Students choose four problems, calculate the exact answers, and compare them with the selected estimates.
