

Name _____

Cart Check Answer Key

1. $\$6 + \$9 + \$3 = \18 , Yes
2. $\$18 + \$6 + \$5 = \29 , No
3. $\$12 + \$18 + \$8 = \38 , Yes
4. $\$25 + \$9 + \$5 = \39 , No
5. $\$15 + \$11 + \$9 = \35 , Yes
6. $\$9 + \$17 + \$5 + \$4 = \$35$, No

Teacher's Guide

- Quick implementation: Review rounding money amounts to the nearest dollar. Remind students to estimate every price before adding.
- Differentiation: Let students who need support write each rounded price above the original price. Challenge advanced students to compare their estimates with the exact totals.
- Engagement: Have students act as budget checkers and decide whether each shopper should head to the checkout or remove an item.
- Extension: Give students a budget and several classroom item prices. Have them create a shopping cart that stays within the budget using estimates.
