

Name _____

Weight Smart Answer Key

- | | |
|-------------|--------------|
| 1. A. 1 g | 6. B. 25 lb |
| 2. A. 150 g | 7. A. 1 oz |
| 3. C. 5 kg | 8. B. 10 lb |
| 4. C. 4 kg | 9. B. 2 lb |
| 5. A. 7 g | 10. C. 15 lb |

Teacher's Guide

- Review grams, kilograms, ounces, and pounds as units used for mass or weight.
- Encourage students to compare each object with familiar benchmarks before choosing.
- For support, identify whether grams, kilograms, ounces, or pounds would be reasonable before considering the number.
- For differentiation, let students handle available classroom objects to develop a sense of their weight.
- Increase engagement by having students predict which item on the worksheet is heaviest and lightest.
- As an extension, have students choose three classroom objects and write a reasonable estimated mass or weight for each.
