

AI and Choices - What Do You Think? Answer Key

1. Should AI choose what news you read?

Sample: *No, because I want to choose for myself. AI might leave out important stories.*

Discussion: Is it okay if AI suggests but doesn't decide?

2. Should AI decide which video games kids are allowed to play?

Sample: *No, because parents should decide, not AI.*

Discussion: Could AI help by checking age ratings?

3. Should AI tell you what time to go to bed?

Sample: *No, because families should decide. AI can remind me, but not force me.*

Discussion: When would reminders be helpful?

4. Should AI choose what food you eat for lunch?

Sample: *No, I want to pick my own food. AI doesn't know what I like.*

Discussion: Could AI help by suggesting healthy options?

5. Should AI recommend books or movies for you to enjoy?

Sample: *Yes, because it helps me find new things.*

Discussion: Does that mean you have to follow AI's choice?

6. Should AI decide who your friends are?

Sample: *No, because friendships should be my choice.*

Discussion: Could AI introduce people with similar interests, without choosing for you?

7. Should AI help doctors by suggesting treatments for sick people?

Sample: *Yes, because it can help doctors make better choices.*

Discussion: Why is it important that doctors still make the final decision?

8. Should AI help teachers by giving students extra practice problems?

Sample: *Yes, because it can give me questions that are just right for my level.*

Discussion: Can AI replace teachers, or just help them?
