

Name _____

How AI Helps Us Shop Online Answer Key

1. Artificial Intelligence
2. What you search for, what you click on, what you put in your cart, or what you bought before (any two)
3. It notices what items people often buy together and uses that to make suggestions.
4. Socks, sports shirts, or a water bottle (any reasonable related item works).
5. It saves time and helps them discover new things.
6. Sometimes it shows things you don't really want or need.
7. Answers will vary (students' own reasoning).
