

Name _____

Decimal Pair-Up Answer Key

1. E
2. G
3. C
4. H
5. D
6. B
7. F
8. A

Teacher's Guide

- Review place value vocabulary before students begin matching.
- Encourage students to identify the whole number first, then match the decimal portion.
- Allow students to use a place value chart if they need additional support.
- Have partners explain why each match is correct before checking answers.
- Challenge advanced students to write two new decimal and expanded form pairs for a classmate to solve.
- Extend the lesson by having students rewrite each matched expanded form in word form.
