

Name _____

Supply Spending Answer Key

1. \$54.00
2. \$28.00
3. \$222.00
4. \$40.00
5. \$90.00
6. \$51.00
7. \$186.00
8. \$78.00
9. \$220.00
10. \$120.00

Teacher's Guide

- Quick implementation: Review the formula $\text{Quantity} \times \text{Unit Cost} = \text{Total Expense}$ before students begin.
- Differentiation: Let students who need support write each multiplication equation before calculating. Challenge advanced students to solve without a calculator.
- Engagement: Present the activity as a purchasing check in which students verify supply costs before a business pays its invoices.
- Extension: Have students choose three items and calculate the combined expense.
