## Workplace Costs Answer Key

1. \$1,100.
2. \$1,350.
3. \$392.
4. \$392.
5. \$740.
6. \$1,050.

### Teacher's Guide

- Quick implementation: Have students identify the requested expense and the operation or operations needed before calculating.
- Differentiation: Let students who need support underline quantities, rates, and other costs. Challenge advanced students to write an equation for each problem.
- Engagement: Assign students the role of a business accountant responsible for calculating expenses for six different workplaces.
- Extension: Have students choose two scenarios, change one numerical value in each, and solve the revised problems.
