

Name _____

Expense Ledger Answer Key

1. \$4,665
2. \$3,325
3. \$4,065
4. \$4,950
5. \$4,275
6. \$4,920
7. \$5,500
8. \$3,450

Teacher's Guide

- Quick implementation: Have students add each business's four expenses and check that all costs are included in the total.
- Differentiation: Allow students who need support to add two expenses at a time. Challenge advanced students to identify the business with the highest and lowest total expenses.
- Engagement: Present students as bookkeepers completing month-end expense records for eight local businesses.
- Extension: Have students calculate the combined expenses of any two businesses and find the difference between their totals.
