## Art Show Fix-Up

**Directions:** Read the short passage below. Some uses of *few*, *a few*, and *the few* are incorrect. Revise the text to fix the determiners while keeping the meaning logical. Write the corrected version below it.

During the school art show, few of my classmates submitted paintings, but a few of them won prizes. The few students who didn't join said they were too nervous to display their work. I walked around the gym and noticed few people actually paying attention to the sculptures. A few artists had worked for months on their projects, yet the few that stayed to see the reactions looked disappointed. By the end of the night, few entries received much attention, but a few teachers praised the effort of all who participated.
