## Small Numbers, Big Success

**Directions:** Read the short narrative below. Fill in each blank with *few*, *a few*, or *the few* so the story makes sense and maintains logical meaning.

When the robotics club first started, only \_\_\_\_\_ students joined. Mr. Davis hoped more would come once the projects began. After a month, \_\_\_\_\_ curious newcomers showed up to see the robots in action. They were amazed by \_\_\_\_\_ who had already built working models from recycled materials. During the science fair, \_\_\_\_\_ visitors stopped by their booth, but \_\_\_\_\_ who stayed asked great questions about how the designs worked. In the end, \_\_\_\_\_ members earned medals for creativity and teamwork, proving that dedication can turn small numbers into big success.
