Teacher's Guide

- **Focus Skill:** Identifying **countable** and **uncountable nouns** to choose correctly between **few** and **less**.
- **Differentiation Tips:**
 - For emerging learners, provide color-coded examples (green for countable, blue for uncountable) before reading.
 - For advanced students, challenge them to explain why each noun belongs in its category.
- **Engagement Ideas:**
 - Turn the activity into a mini "grammar mystery": students work in pairs as detectives finding clues (nouns).
 - Use objects or pictures (e.g., rice vs. apples) to model the difference visually before the activity.
- **Extension Activities:**
 - Have students write their own short paragraph using both **few** and **less** correctly.
 - Ask learners to transform uncountable nouns into countable forms when possible (e.g., "two cups of milk").
