Directions: Read the short scenario carefully. Then answer each question by choosing the best answer.

The Group Chat

A group of seventh graders started a class group chat to plan their science fair project. Everyone was supposed to share ideas about their display and research. At first, the chat worked well. Then, Jordan began posting jokes unrelated to the project. The messages made it hard for others to find important updates.

Maya asked politely, "Can we keep the chat about science?" Jordan ignored her and sent more memes. Soon, two classmates left the chat because it became too distracting. After a few days, Jordan realized the group stopped sharing progress and the project was falling behind. He decided to apologize and make a new chat just for project messages. The group agreed to use friendly reminders to stay on topic next time.

1. What was the main purpose of the group chat?
 - A. To tell jokes and share memes
 - B. To plan the science fair project
 - C. To talk about homework for other classes
 - D. To plan a party
2. How did Jordan break the group rule?
 - A. He forgot to join the chat
 - B. He didn't post enough ideas
 - C. He sent off-topic messages that distracted others
 - D. He turned in the project late
3. What did Maya do to try to solve the problem?
 - A. She left the group chat immediately
 - B. She ignored Jordan's posts
 - C. She told the teacher right away
 - D. She asked politely to stay on topic
4. What consequence happened when rules were not followed?
 - A. The group worked faster
 - B. Everyone became more focused
 - C. The group stopped communicating effectively
 - D. The teacher gave them extra credit
5. What did Jordan learn by the end of the story?
 - A. That following group rules helps everyone succeed
 - B. That digital social norms do not matter
 - C. That ignoring rules keeps things fun
 - D. That group chats should be for jokes only
