

Name _____

Whole Hunt Answer Key

1. 40
2. 24
3. 30
4. 35
5. 36
6. 40
7. 60
8. 49
9. 45
10. 40
11. 32
12. 56

Teacher's Guide

- Remind students that the given value is only part of the whole.
- Encourage students to first find the value of one equal part by dividing when needed, then multiply by the denominator to find the whole.
- Provide fraction bars or drawings for students who benefit from visual support.
- Pair students to explain how they found one missing whole using words and equations.
- Challenge advanced students to write a matching "fraction of a number" equation for each completed problem.
- Extend learning by having students create three missing whole problems for a partner to solve.
