- Yellow: None
- Green: 4, 12
- Blue: 10
- Purple: 2
- Pink: 3, 5
- Brown: 7, 9

Teacher's Guide

- Have students solve all problems before coloring to reinforce accuracy.
- Encourage students to check answers with a partner before using colors.
- Provide multiplication fact charts for students who need extra support.
- Challenge early finishers to write one new "fraction of a number" problem for each color.
- Display a completed sample so students can quickly check if their colors match the expected pattern.
- Review how to multiply a whole number by a unit fraction before starting the activity.
