

Name _____

Fraction Picks Answer Key

- 1) C
- 2) B
- 3) C
- 4) B
- 5) C
- 6) C
- 7) C
- 8) B
- 9) C
- 10) B
- 11) B
- 12) C

Teacher's Guide

- Review that the word "of" means multiply when finding a fraction of a whole number.
- Encourage students to estimate whether the answer should be less than or greater than one-half of the whole before solving.
- Allow students to use fraction bars or multiplication charts if they need support.
- Have students explain why the incorrect choices are not reasonable after completing the worksheet.
- Challenge early finishers to write three multiple-choice questions of their own with one correct answer and three distractors.
- Remind students to check that each answer is a reasonable fraction of the original whole number before selecting it.
