

Name _____

Estimate Pair Up Answer Key

1. D
2. G
3. B
4. I
5. J
6. C
7. H
8. C
9. E
10. A

Teacher's Guide

- Quick implementation: Remind students to change each number to its front-end value before adding or subtracting. Exact calculation is not needed.
- Differentiation: Have students write the front-end values beside each expression before searching for a match.
- Engagement: Let students cross out each answer choice after matching it. Point out that some choices may be used more than once.
- Extension: Have students choose three expressions, calculate the exact answers, and compare them with the estimates.
