

Name _____

Dollar Fronts

Directions: Use front-end estimation to estimate each money sum or difference. Keep the leading whole-number digit and change the remaining digits to zeros.

Example: $\$47.85 + \$32.40 \approx \$40 + \$30 = \$70$

1. $\$28.75 + \$43.20 \approx \$______ + \$______ = \$______$

2. $\$67.40 - \$21.85 \approx \$______ - \$______ = \$______$

3. $\$84.65 + \$53.90 \approx \$______ + \$______ = \$______$

4. $\$96.25 - \$34.70 \approx \$______ - \$______ = \$______$

5. $\$326.80 + \$471.35 \approx \$______ + \$______ = \$______$

6. $\$758.45 - \$243.60 \approx \$______ - \$______ = \$______$

7. $\$1,482.75 + \$2,315.20 \approx \$______ + \$______ = \$______$

8. $\$4,625.90 - \$2,184.35 \approx \$______ - \$______ = \$______$
