

Name _____

Sum Snapshots

Directions: Write the front-end value of each addend. Then add the front-end values to estimate the sum.

Example: $47 + 82 \rightarrow 40 + 80 = 120$

1. $63 + 28 \rightarrow \underline{\quad} + \underline{\quad} = \underline{\quad}$

2. $74 + 51 \rightarrow \underline{\quad} + \underline{\quad} = \underline{\quad}$

3. $326 + 481 \rightarrow \underline{\quad} + \underline{\quad} = \underline{\quad}$

4. $752 + 219 \rightarrow \underline{\quad} + \underline{\quad} = \underline{\quad}$

5. $583 + 347 \rightarrow \underline{\quad} + \underline{\quad} = \underline{\quad}$

6. $1,438 + 2,765 \rightarrow \underline{\quad} + \underline{\quad} = \underline{\quad}$

7. $3,621 + 4,158 \rightarrow \underline{\quad} + \underline{\quad} = \underline{\quad}$

8. $5,294 + 2,817 \rightarrow \underline{\quad} + \underline{\quad} = \underline{\quad}$

9. $6,735 + 1,942 \rightarrow \underline{\quad} + \underline{\quad} = \underline{\quad}$

10. $4,386 + 3,521 \rightarrow \underline{\quad} + \underline{\quad} = \underline{\quad}$
