Teacher Notes / Guide

- **Skill reinforced:** Students learn to shift responses from **simple future** into **future continuous**, strengthening awareness of ongoing future actions.
- **Tip:** Encourage students to role-play the dialogues in pairs: one reads the question, the other responds in **future continuous**.
- **Common mistake alert:** Students may drop “be” (e.g., *will studying* instead of *will be studying*). Remind them of the full formula.
- **Extension:** Have students write their own two-line dialogues in simple future, then swap papers with a partner to rewrite in **future continuous**.
