## Life By 2050 Answer Key

(Sample answers - wording may vary, but all must be in **future perfect tense**.)

1. By 2050, technology **will have changed** many aspects of daily life.
2. By 2050, cities **will have used** smart systems to manage traffic and energy.
3. By 2050, doctors **will have used** advanced robots to assist in surgeries.
4. By 2050, people **will have traveled** in driverless cars and **will have flown** short distances in personal air vehicles.
5. By 2050, students **will have learned** through virtual classrooms connected to teachers worldwide.
6. By 2050, scientists **will have explored** Mars and **will have built** permanent research stations there.

### Teacher Notes:

- This activity pushes students to **transform future simple into future perfect**, reinforcing the structure **will have + past participle**.
- Encourage students to underline **time markers** like *by 2050* - these signal the use of future perfect.
- For differentiation, advanced students can expand answers into full-sentence predictions (e.g., *By 2050, people will have traveled in driverless cars for many years*).
- Extension: Students write their own **"Future Forecast Passage"** for 2100 and exchange with a partner, who must rewrite it in the **future perfect tense**.
