## Glossary Match-Up Answer Key

1. D. **Restore** - To bring back or repair something to its original condition.
2. F. **Collaboration** - Working together with others to achieve a goal.
3. E. **Biologist** - A scientist who studies living organisms.
4. A. **Conservation** - The protection and careful use of natural resources.
5. C. **Endangered** - At risk of disappearing or becoming extinct.
6. B. **Ecosystem** - A community of living things and their environment, interacting together.

### Teacher Notes:

- This activity strengthens students' **glossary and dictionary skills** by requiring them to connect highlighted terms in context to accurate definitions.
- Encourage students to reread the sentences where each bold word appears before choosing a definition. This reinforces the habit of using **context clues** to support glossary understanding.
