

Name _____

Definition Hunt Answer Key

Correct Definitions:

1. Biodiversity → The variety of life in a particular place, including plants, animals, and microorganisms.
2. Resilient → Able to recover quickly or withstand difficult conditions.
3. Habitat → The natural home or environment of an organism.
4. Interference → The act of getting in the way of something or causing disruption.
5. Sustainability → The ability to maintain or support something over time without causing harm to the environment.

Teacher Notes:

- This activity develops **dictionary and glossary navigation skills** by asking students to locate, copy, and use exact definitions.
- Students may be tempted to paraphrase; remind them that the task is to copy the **precise wording**, as this models real dictionary use.
- The **bonus sentence** checks application: e.g., "The desert is the habitat of many reptiles."
- Encourage students to underline or highlight where they found the definition in the mini-dictionary to reinforce the **search-and-locate skill**.
