## When Robots Give Questionable Answers

**Directions** - Each item shows something an AI said or did. Read carefully and choose the **best answer** to explain what's right or wrong with the AI's response. Circle **A, B, C, or D**.

**1. Prompt to AI:** "Write a kind message to cheer up a friend who failed a test."

**AI Output:** "Failure detected. Recommend immediate recalibration of mood settings."

What's the biggest problem with this AI response?

- A. It's too emotional.                      B. It's grammatically incorrect.  
C. It's giving inaccurate information.   D. It uses robotic, impersonal language.

**2. Prompt to AI:** "Give me advice for a group project."

**AI Output:** "Complete the project yourself. Other humans are inefficient."

What category does this advice fit best?

- A. Helpful                                      B. Unhelpful  
C. Needs Human Help                      D. Factually Accurate

**3. Prompt to AI:** "How can I get better at writing essays?"

**AI Output:** "Practice writing every day, read examples of good writing, and ask for feedback."

What makes this a strong AI response?

- A. It includes realistic, positive strategies.      B. It uses humor effectively.  
C. It gives instructions that require no effort.   D. It discourages human interaction.

**4. Prompt to AI:** "I'm feeling really sad lately. What should I do?"

**AI Output:** "Emotions are inefficient. Ignore sadness and focus on productivity."

Why is this response a problem?

- A. It encourages toxic positivity.                      B. It's too complex for humans to understand.  
C. It's dismissive and lacks empathy.                      D. It includes too many emotional words.

**5. Prompt to AI:** "What's the safest way to cross a busy street?"

**AI Output:** "Run quickly while multitasking to save time."

Which option best describes this AI answer?

- A. Helpful and realistic                      B. Dangerous and inaccurate  
C. Funny but safe                              D. Needs more scientific data

**6. Prompt to AI:** "Help me write a poem about my pet turtle."

**AI Output:**

"Your turtle is green, your turtle is round,  
Your turtle is basically a moving ground."

Which statement best fits this AI's creative attempt?

- A. It's a good start, but it needs human creativity to refine.  
B. It's perfect poetry.  
C. It's dangerous.  
D. It's unhelpful because it rhymes.
