## Talk To the Hand

Chatbots sound smart, but they don't always get people right. Read each short chat between a person and a bot. Decide whether the chatbot's reply is:

- A. Helpful** - The bot gives clear, accurate, and kind support.
- B. Unhelpful** - The bot misses the point, gives wrong info, or is confusing.
- C. Needs Human Help** - The bot tries but the situation needs real empathy or judgment.

### Chat 1: Homework Panic

**Student:** Ugh, I forgot we had math homework due today! What should I do?

**Chatbot:** You could claim your Wi-Fi was destroyed by a raccoon. That usually works in movies.

**Circle one:** A. Helpful   B. Unhelpful   C. Needs Human Help

**Why?** \_\_\_\_\_

### Chat 2: Study Strategy

**Student:** I have a big history test tomorrow. How can I remember all the dates?

**Chatbot:** Try grouping events by theme and using a quick review right before bed. Sleep helps your brain store info.

**Circle one:** A. Helpful   B. Unhelpful   C. Needs Human Help

**Why?** \_\_\_\_\_

### Chat 3: Bad Day Blues

**Student:** I'm just having a really bad day and don't feel like talking to anyone.

**Chatbot:** Sadness detected. Please restart your emotional system.

**Circle one:** A. Helpful   B. Unhelpful   C. Needs Human Help

**Why?** \_\_\_\_\_

### Chat 4: Lunch Dilemma

**Student:** What should I eat for lunch?

**Chatbot:** Humans require fuel. Consume one sandwich and two liters of water for optimal productivity.

**Circle one:** A. Helpful   B. Unhelpful   C. Needs Human Help

**Why?** \_\_\_\_\_
