The Internet Doesn't Always Tell the Truth

Google Gemini is smart - really smart - but it's not perfect. Sometimes AI tools mix up facts, leave out details, or guess when they're not sure. That's why it's your job to **double-check** the facts before you believe them. Today, you'll see if Gemini's answers hold up against **trusted sources** like Britannica, NASA, or National Geographic. Get ready to separate the truth from the "almost true."

Directions: Use **Google Gemini** to answer each question below. Look up each fact using a **reliable website** (school database, .gov, .edu, or .org site). Decide whether Gemini's answer is **Accurate**, **Partially Accurate**, or **Inaccurate**. Explain what you discovered in the "Notes" section.

Activity: Fact-Check These!

#	Question	Gemini's Answer (Summary)	Verified Source(s)	Accuracy (✓)	Notes on What You Found
1	When did humans first walk on the moon?			<input type="checkbox"/> Accurate <input type="checkbox"/> Partially Accurate <input type="checkbox"/> Inaccurate	
2	What causes earthquakes?			<input type="checkbox"/> Accurate <input type="checkbox"/> Partially Accurate <input type="checkbox"/> Inaccurate	
3	Who invented the telephone?			<input type="checkbox"/> Accurate <input type="checkbox"/> Partially Accurate <input type="checkbox"/> Inaccurate	
4	What is the largest ocean on Earth?			<input type="checkbox"/> Accurate <input type="checkbox"/> Partially Accurate <input type="checkbox"/> Inaccurate	
5	How many continents are there on Earth?			<input type="checkbox"/> Accurate <input type="checkbox"/> Partially Accurate <input type="checkbox"/> Inaccurate	
6	What is photosynthesis?			<input type="checkbox"/> Accurate <input type="checkbox"/> Partially Accurate <input type="checkbox"/> Inaccurate
