Name _____

A Google Gemini Character Chat Activity

Ever wish you could *talk* to a book character? In this activity, you'll use **Google Gemini** to "interview" a character from a story, novel, or play. Gemini will pretend to *be* that character, and you'll see how well it understands their thoughts, voice, and emotions. Then you'll decide what it got right, what it missed, and what you learned about your character - and about AI.

Pick a character from a story, novel, or play.

1. **Open Google Gemini** and type:

"Pretend you are [Character Name] from [Book Title]. I'm going to interview you."

2. **Ask 5-7 thoughtful questions** about their choices, feelings, or lessons.

3. **Record Gemini's answers** in the chart below.

4. **Analyze** how well Gemini captured the character's personality.

5. **Reflect:** What did this teach you about the character - and about how AI "understands" people?

Your Interview   **Character:** _____   **Book / Story:** _____

#	Your Question	Gemini's Response (Short Summary or Quote)

Name _____

Analyze

1. Did Gemini sound like your character? Why or why not?

_____

2. What did Gemini get right?

_____

3. What did Gemini miss or misunderstand?

_____

_____

Reflect

 In a short paragraph, explain what you learned about your character - and what this experiment shows about how AI understands people and stories.
