

Name _____

Kite Prediction Answer Key

Possible Predictions (Accept any reasonable answer):

- The wind might blow too hard and the kite could fly away.
- Eli might bring the kite down quickly and run home.
- Rain could start, making Eli put his kite away.
- The string might tangle because of the strong wind.

Teacher Guide:

This worksheet trains students to stop reading and **make predictions based on clues** in the text (storm clouds, stronger wind). Emphasize that predictions are not always “right or wrong.” What matters is whether they use story details to make a smart guess. Encourage drawing to help students visualize their ideas.
