Name _____

Plan Showdown Answer Key

1. Plan A: $260 Plan B: $315 Less: Plan A
2. Plan A: $350 Plan B: $380 Less: Plan A
3. Plan A: $370 Plan B: $390 Less: Plan A
4. Plan A: $400 Plan B: $375 Less: Plan B
5. Plan A: $660 Plan B: $515 Less: Plan B

Teacher's Guide

- Review that total cost may include both the monthly premium and the healthcare costs listed in each scenario.
- Have students calculate each plan separately before comparing the totals.
- For extra support, let students label premium, copay, and coinsurance amounts before adding them.
- For differentiation, begin with the copay scenarios before moving to the percentage-based coinsurance scenarios.
- Increase engagement by having students predict the less expensive plan before calculating, then check their prediction.
- As an extension, have students find how much money the less expensive plan saves in each scenario.
