Name _____

Benefit Split Answer Key

1. Employer: $3,600.00 Employee: $1,200.00
2. Employer: $3,720.00 Employee: $2,480.00
3. Employer: $4,320.00 Employee: $1,080.00
4. Employer: $5,250.00 Employee: $2,250.00
5. Employer: $5,616.00 Employee: $3,024.00
6. Employer: $5,060.00 Employee: $4,140.00
7. Employer: $9,180.00 Employee: $1,620.00
8. Employer: $8,928.00 Employee: $3,472.00

Teacher's Guide

- Review how to convert a percent to a decimal and multiply it by the total premium.
- Remind students that employer contribution + employee contribution = total premium.
- For extra support, have students first find the employee's percentage by subtracting the employer's percentage from 100%.
- For differentiation, allow calculators while requiring students to write the percentage calculation for each problem.
- Increase engagement by asking students to identify which employee receives the greatest percentage of employer support.
- As an extension, have students calculate the monthly employer and employee contributions for one of the plans.
