## Turning Points in AI History

**Instructions** - Below are 12 important events in the history of Artificial Intelligence. Rank them from **1 (most important)** to **12 (least important)** by writing a number on the blank line in front of each event. Then, choose **two events** and explain why you ranked them where you did.

### Events to Rank

- \_\_\_\_\_ 1. Alan Turing publishes *Computing Machinery and Intelligence* (1950)
- \_\_\_\_\_ 2. The Dartmouth Conference: "Birth of AI" (1956)
- \_\_\_\_\_ 3. The invention of the Perceptron, early neural network (1958)
- \_\_\_\_\_ 4. Creation of ELIZA, early chatbot (1966)
- \_\_\_\_\_ 5. The first AI Winter (1970s)
- \_\_\_\_\_ 6. Expert Systems like MYCIN (1970s)
- \_\_\_\_\_ 7. Revival of Neural Networks with Backpropagation (1980s)
- \_\_\_\_\_ 8. IBM's Deep Blue defeats Garry Kasparov (1997)
- \_\_\_\_\_ 9. IBM's Watson wins *Jeopardy!* (2011)
- \_\_\_\_\_ 10. AlphaGo defeats world champion Lee Sedol (2016)
- \_\_\_\_\_ 11. Release of GPT-3 (2020)
- \_\_\_\_\_ 12. Mainstream adoption of AI tools like ChatGPT (2023)

### Reflection

Event # \_\_\_\_: I ranked this highly because...

Event # \_\_\_\_: I ranked this lower because...
