Name _____

Withholding Desk Answer Key

1. $120
2. $198
3. $300
4. $432
5. $270
6. $440
7. $700
8. $692

Teacher's Guide

- Quick implementation: Review how to convert a percent to a decimal and multiply it by the paycheck amount. Explain that all withholding rules on this worksheet are fictional and simplified.
- Differentiation: Begin with Problems 1 to 4 for single-rate practice. Guide students through the extra withholding and split-rate problems as needed.
- Engagement: Have students act as payroll clerks and check a partner's calculations before approving each paycheck.
- Extension: Ask students to create a fictional paycheck with a withholding rate and an additional fixed withholding amount, then exchange it with a partner to solve.
