Name _____

Tax Total Challenge Answer Key

1. $1,800
2. $2,880
3. $2,600
4. $6,000
5. $8,280
6. $10,500
7. $13,200
8. $18,000
9. $13,440
10. $22,800

Teacher's Guide

- Quick implementation: Review how to convert a percent to a decimal. Have students multiply each taxable income by the given rate.
- Differentiation: Let students use a percent-to-decimal reference or calculator as needed. Challenge advanced students to solve mentally when possible.
- Engagement: Have students work in pairs as "tax assistants" and check each other's calculations for accuracy.
- Extension: Ask students to choose two taxable incomes and calculate the difference in tax if each rate increases by 2 percentage points.
