Teacher's Guide

- Quick implementation: Review that taxable income in this simplified activity equals gross income minus all listed allowable deductions.
- Differentiation: Have students first add multiple deductions to find a total, then subtract. Provide a calculator when appropriate.
- Engagement: Let students act as tax preparers and check a partner's taxable income calculations.
- Extension: Ask students to create one new gross-income example with two or three deductions, then exchange it with a classmate to solve.
