

Name _____

Indian Ocean Vocabulary Answer Key

- | | |
|------|------|
| 1. D | 5. G |
| 2. H | 6. E |
| 3. A | 7. F |
| 4. C | 8. B |

Teacher's Guide

- Helps students build strong vocabulary related to oceans and geography.
- Effective as independent practice, small group work, or a warm up activity.
- Use definitions as a quick review before a lesson on Indian Ocean features.

Differentiation Tips

- Provide sentence examples for students who need context for each term.
- Allow younger learners to work with partners to talk through choices.
- Challenge advanced students to write an original sentence using each vocabulary word.

Engagement Ideas

- Have students sketch a simple picture representing one of the terms such as **coral reef** or **tide**.
- Create a class word wall with the terms and student friendly meanings.
- Invite students to sort the vocabulary words into categories such as animals, climate, and water features.

Extension Opportunities

- Ask students to research one term they find most interesting and share a short explanation with the class.
- Have students write a short paragraph describing how several terms connect to real Indian Ocean environments.
