## Indian Ocean Clues Answer Key

- |              |                 |
|--------------|-----------------|
| 1. monsoons  | 6. whale        |
| 2. monsoon   | 7. sea          |
| 3. farming   | 8. regions      |
| 4. Australia | 9. monsoon      |
| 5. coral     | 10. communities |

### Teacher's Guide

- Great for reinforcing key vocabulary and concepts about the Indian Ocean.
- Use as guided practice, independent work, or a quick comprehension check.
- Read sentences aloud for younger students and allow repeated readings.

### Differentiation Tips

- Provide a word bank for students who need extra support.
- For advanced students, ask them to rewrite one sentence using a different but related key term.
- Allow partner work so students can discuss clues and reasoning.

### Engagement Ideas

- Have students highlight all science or geography terms such as **current**, **monsoon**, and **reef**.
- Invite students to draw one feature they filled in, such as coral reefs or monsoon winds.

### Extension Opportunities

- Ask students to research a specific current or climate pattern in the Indian Ocean and share one paragraph about it.
- Explore how climate change impacts Indian Ocean communities and discuss real world examples.
