| 3. steam engine | 8. child labor       |
| 4. factory      | 9. assembly line     |
| 5. tenement     | 10. wage             |

### Teacher's Guide

- **Differentiation Tips:**
  - Offer a word bank with brief definitions for struggling readers.
  - For advanced students, remove the word bank and have them recall vocabulary independently.
  - Encourage English learners to sketch each word to connect visuals with meaning.
- **Engagement Ideas:**
  - Turn it into a class "speed fill" race - students compete to complete sentences accurately and quickly.
  - Read each sentence aloud dramatically and have students call out or write down the missing word.
- **Extension Activities:**
  - Ask students to choose three words and write short paragraphs explaining how each shaped life during the Industrial Revolution.
  - Create a "Then and Now" comparison using words like *factory* or *urbanization* to show how industrial changes still affect life today.
