2. Correct.
3. Correct.
4. Correct.
5. Incorrect. The distance increased through Week 3, then decreased in Week 4.
6. Incorrect. Saturday and Sunday had 95 visitors altogether.

Teacher's Guide

- Quick implementation: Have students check each conclusion against the numbers before deciding whether it is correct.
- Differentiation: For support, let students underline the values used in each conclusion. For added challenge, require complete sentences for all corrections.
- Engagement: Read each conclusion as a case file and have students give a verdict based only on the evidence.
- Extension: Have students choose one data display and write a new correct conclusion about it for a partner to verify.
